

Imaging options for your team

A practical starting point for an employer discussion

Start with a clear discussion

Organizations can contact New Hope Life Scan to discuss imaging options for employees. Begin with the purpose, examination and practical arrangements before planning participation or a start date.

Bring to the first call

- Your organization name and benefits contact
- Approximate number of participants and where they are based
- Purpose, preferred timing, budget and proposed funding

Leave employee names, lists, medical information and documents out of a first inquiry.

Confirm before anyone books

- Exact examination, imaging method, body region and availability
- Eligibility, clinical review, order requirements and preparation
- Appointment capacity, location, payment and cancellation terms
- How reports and images are delivered, who explains findings and who coordinates follow-up

Ask for inclusions and the total fee in written terms. Employer arrangements need their own written terms.

Listed scan prices

Single-region CT - \$450

One body region, including 3D reconstruction.

Thermography (DITI)

\$250 regional / \$395 full body. Records temperature patterns on the skin surface.

Trauma Screen - \$650

Listed coverage: head, neck and upper back. Call to confirm the examination and order requirements. This is not an emergency service.

Total Clarity - \$1,250

Full-body DITI, chest and lung CT, coronary calcium score, visceral fat analysis and a radiologist report.

These listed prices are a reference for the discussion. Confirm eligibility, inclusions and the total fee before booking.

CT and thermography serve different purposes. "Full body" applies to DITI, not to the CT component of Total Clarity.

Employee privacy

Employer participation does not establish access to an employee's medical information. Confirm consent, authorization and records arrangements with the clinic. Keep program logistics separate from individual clinical records.

(681) 206-9434

2812 E. Imperial Hwy, Brea, CA 92821

Call to confirm availability before planning a visit.
